

# Get Ready for High Winds and Rain

## Have an emergency kit

Your emergency kit should take care of yourself and your family for at least three days.

If you don't have a kit, get one ready today. Make sure you have water, canned foods and medications.

## Get your house and family ready

If you have a home generator, make sure you know how to use it safely.

Charge your electronics, and have flashlights and batteries available.

Fuel vehicles and stock wood for woodstoves.

## Be informed

Be familiar with evacuation routes if you live near the coast or areas that flood.

Have battery powered radio or tv for emergency instructions.
